## Summary

---

I am a Front End Web Developer with 3 years of experience working in a professional setting that has a proven track record of rapidly learning newer technologies for employer needs. My expertise includes full-stack development, with a focus on front-end technologies such as React, React Native, and AlpineJS.

## TECHNICAL SKILLS

---

**Programming Languages** – Javascript, Typescript, Python, HTML, CSS3, and Go

**Software** –AWS, MongoDB, SQL,NextJS, TailwindCSS, AlpineJS, React, Bootstrap, Jest, Webpack,Vite, ExpressJS, NodeJS, Expo, AWS, Redux, Chai/Mocha, Jest, Cypress, VSCode, IntelliJ, and Mongoose

## RELEVANT WORK EXPERIENCE

---

**AutoCorner LLC** – Full Stack Software Engineer

*May 2020 – Current*

- Updated the company's mobile application by developing a cross-platform app, AutoCorner 4 Mobile Dealer, using ReactNative framework/Expo tool kit and fully tested with Jest testing framework.
- Leveraged design tools like Figma to convert design specifications into fully responsive templates using TailwindCSS and AlpineJS
- Communicated with clients to create and modify custom design templates using TailwindCSS and Alpine JS.
- Built and fully tested Node.js REST APIs for an internal tool called SocialHub which allows users to manage content on several platforms including facebook, instagram, medium, and personal blog.
- Other services I have worked on internally include page hit analytics, a CRM platform.

## PERSONAL PROJECT

---

**Markdown In Browser Editor**

*December 2022 - January 2023*

- Full stack MERN application allowing users to edit/render markdown documents directly in the browser with Monaco Browser Code Editor.
- Developed NodeJs/Express Rest API for user authentication and content creation/modification
- Deployed app via Railway cloud service and github pages.
- Leveraged ReactJS and Tailwind css for application front end

  - Live Application: <https://www.travreadz.com/>

**GitHub User Search**

*November 2022 - December 2023*

- Integrates with Github user api to create lists of users and track their current repos
- Uses TRPC/NEXT.JS/Typescript to provide full type safety for front and backend projects
- Authenticates users via google sign in using NextAuth library
- Persists data via Postgresql database mapping to tables via Prisma
